The economy of South Mississippi has made unparalleled progress in the last 25 years. Many factors have contributed to this growth.

Coast Electric Power Association, with headquarters at Bay St. Louis, stands out as one of the leading contributors to this economic growth in both urban and rural areas of Hancock, Harrison and Pearl River Counties.

From a meager beginning when a few families and the Aaron Academy Church first received electricity on May 18, 1938, Coast Electric has grown into a major economic influence.

There is a direct parallel between the growth in number of miles of line of Coast Electric and the growth of the economy of the area it serves. Even more marked has been the increased business activity of the towns in the area which have reaped the benefits of a growing rural economy.

At first electricity in the area meant convenience and comfort. In the beginning there were the lights and the inevitable radio, followed by refrigeration and freezing of foods for storage; sanitary facilities provided by running water; flameless cooking and water heaters; and the work saving appliances and equipment such as washers, dryers, and other electric equipment on the farm and in the home. Then came television, fans, air-conditioning, electric heat and a myriad of small appliances and tools. As an outgrowth of these uses of electricity for convenience, necessity and comfort have grown the major elements: A higher standard of living and the resulting economic progress!

Coast Electric is completely owned and controlled by the people it serves in its three counties of operation. These members borrow money (which they are repaying with interest) to build their own lines and supply themselves with electricity. Profit power companies had said this could not be successfully done. Let's look at the progress which has been made since the first Coast Electric lines were energized on May 18, 1938—just 25 years ago—and you judge for yourself whether it "could be done" or not!

COAST ELECTRIC

REPRESENTS

25

YEARS OF

ECONOMIC GROWTH

IN HANCOCK, HARRISON

AND PEARL RIVER COUNTIES

From The Era Of Wood Stoves And Kerosene Lamps To The Age Of Moon-Shot Rockets

In the 25 years since its beginning, Coast Electric's members have spent more than \$20,000,000 in this area on electric appliances, wiring and fixtures alone.

From an initial loan of \$72,000—long since repaid in full—the members of Coast Electric have seen their Association grow to an approximate \$4,500,000 Corporation.

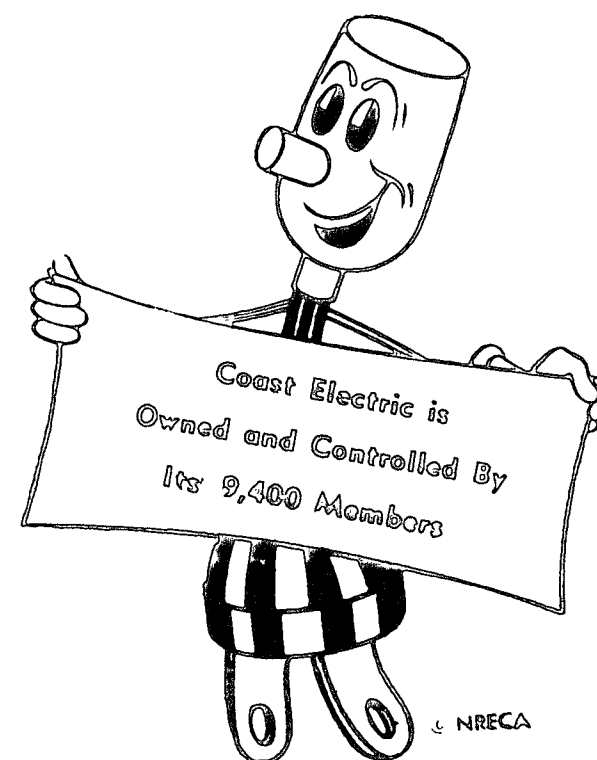

With modern electrical conveniences came pride in the home. Still more millions have been spent in painting, repairing and rebuilding. These things have been possible because of the increased income which has been the result of labor and time saving electrical equipment

Coast Electric employs 54 people who live in Hancock, Harrison and Pearl River Counties, with a payroll of more than \$280,000 annually.

All supplies and equipment are purchased in Hancock, Harrison and Pearl River Counties when they are available on the local market. For example, more than \$500,000 has been spent for some 38,000 poles which grew, were cut, skinned and creosoted in this area to support the nearly 2,000 miles of Coast Electric lines. All vehicles and supplies are purchased from dealers in the three counties.

With the exception of the tourist industry, Coast Electric has in all probability made the largest single contribution to the economic growth of its area than any other factor. Certainly Coast Electric has been more influential in raising the standard of living of its members than any other contributing factor.

The more than 9,000 member-owners of Coast Electric are proud of the progress they have made in the last 25 years!

At best still bad

Monday the supreme court made public a decision that at least broadens the meaning of "stato" action where race, creed and color and the 14th amendment to our constitution are involved. It may have gone far beyond that. Certainly Mr. Justice John Harlan, who presumably knows what his eight colleagues said in the privacy of their regular conferences, thought it did.

According to the Associated Press his partial dissent (he did not dissent on the result of the cases before the court) said a shopkeeper's right to bar customers on his own "has certainly become a greatly diluted right, if it has not, indeed, been totally destroyed". We might add that that right predates the creation of the supreme court itself and until now has not been seriously questioned by the supreme court.

However, in the opinion of the court, delivered by Mr. Chief Justice Earl Warren the actual holding seems to be that statements and other actions by municipal officials prior to sit-in demonstrations may so color the background of the case that "the city must be treated exactly as if it had an ordinance prohibiting such conduct". If limited to such circumstances the decision merely extends, unfortunately we think, the number of occasions when trouble making pressure groups are protected from paying the consequences of their wrong doing. It also is a warning to public officials, governors, mayors, chiefs of police and others not to make intemperate statements that they will not "permit" such and such when race, creed or color problems loom in the horizon.

Also, if held to this limited scope, the decision does less violence to our traditions than did the school desegregation case, Brown vs. Board of Education.

Buy, wear it

Once each year the ladies' auxiliary of the American Legion asks all of us to purchase a poppy in tribute to the half million or more Americans who died fighting our country's wars.

More important than the good to which the proceeds of the sale of poppies is put, assistance to needy and disabled service men and women, it seems to us is the opportunity as a group for us to make this tangible demonstration in the honor of those who sacrificed so much for their country.

Poppies will be sold by the ladies Saturday. For a pittance you can honor our war dead. Buy a poppy and wear it.

As New Year's presents we asked three things of the city fathers. Already they have made Gex and Cue Streets one way. This week they gave us and the public the second by completing a sidewalk of sorts on Dunbar Avenue from U. S. 90 to North Bay Elementary School. Wonder if we'll get the third—widening Main Street from Second to the beach or making it one way.

Waveland doesn't qualify for postal delivery service
Waveland Alderman John Lewis, Jr., has been notified by the Post Office Department that Waveland does not qualify for postal delivery service.

Lack of population of 2,500 and annual postal receipts of \$10,000 were cited in a letter from C. E. Roberts, director, local service division of the Post Office Department, as the reasons Waveland cannot be designated as a post office. Lewis had previously indicated that the post office would be established in the future.

"Horses" in a GAS company ad?

Yes, because fine riding horses - and ships, and beaches, and lakes - attract vacationers. And the money those visitors spend in our cities and towns makes business better for everybody.

For 24 years, our company has published advertising in national magazines to tell the advantages of living, working and playing - and building industrial plants - in the Gulf South. We believe our advertising has contributed to the amazing growth and prosperity of the area we serve.
